ABOUT THE PROGRAM

Leading Operational Excellence is a two-day, hands-on course that will help you create and implement a cutting-edge operations program. You will see immediate results in higher margins for your firm and your employee engagement. You will learn a strategic approach for developing best-in-class operations from FMI's practice leaders. You will understand how to maximize information sharing and minimize resources while providing customer value. This is an innovative approach that brings the boardroom to the break room and builds a lasting ability to execute consistently in today's challenging environment.

DEVELOPED FOR

- Presidents
- Vice presidents
- Operations managers
- Project managers
- Other senior-level managers

NOTE: FMI does not recommend this program for superintendents and foremen unless accompanied by senior management

Fantastic program on operational excellence! The strategic education I received from this program was empowering and engaging! ”

— Byron Isaac
Director
Silverstone Precast Inc.

BENEFITS

More than 65 years, FMI has been the leading management consulting and investment banking firm dedicated exclusively to engineering and construction, infrastructure and the built environment. Leading operational excellence instructors are experienced FMI consultants, who spend most of their time working with contractors in a hands-on advisory role to help them improve company performance. This experience allows them to teach the content from real-life experience and a collection of industry best practices. The instructors will share many practical examples of how they have helped construction firms like yours improve productivity, project performance and profitability.

- Discover what it takes to achieve operational excellence and create a sustainable advantage.
- Review the lean systems that can help bid competitively and be more profitable.
- Learn industry best practices for optimizing project execution and productivity.
- Explore FMI's latest findings and keys to successful prefabrication.
- Examine a bottom-up approach to operations that drives success.
- Identify the tips to sustain the long-term commitment required to change your organization.
- Analyze the operations of your peers and competitors.

AGENDA OVERVIEW

Day 1

- Operational excellence in the new operating environment
- Effective information management and power to the edge

Day 2

- How to optimize your business
- Building and implementing a plan to improve productivity and operational excellence
